

BIG WINTER BLAST 20

Product data & project planning

WAVE design visualization · configurable layout

20-foot blast freezer container · Front container cargo doors

WAVE BIG WINTER BLAST 20 is a configurable blast freezer container for batch freezing. The 20-foot design combines 2 side-mounted refrigeration units with front container cargo doors for loading. Its insulated container layout provides a dedicated freezing area at your production or logistics site. WAVE plans the system around your product and loading process. Target temperature, throughput and freezing time are sized for your application and specified in your individual quotation.

from €29,750

Provisional guide price, excluding VAT and transport. Final pricing depends on the specified configuration.

WAVE plans the system for your site. Contact: wave.cc/en/contact-us

Configuration & system sizing

Application	Batch blast freezing
Planned format	20 ft
Container body L × W × H (planning size)	6,058 × 2,438 × 2,591 mm
Refrigeration units in design	2 · side mounted
Access in design	Front container cargo doors
Refrigeration / cycle time / throughput	Sized for product, batch and target core temperature
Power supply / refrigerant	Specified with equipment selection
Site footprint	Allow additional space for equipment, access and service

Information needed for your quotation

To size the system, tell us the product, weight per batch, incoming and target core temperatures, required cycle time, packaging and loading layout, location and available electrical supply. We use these to specify refrigeration capacity, airflow and equipment.

Planning information for the illustrated configuration. Confirmed performance specifications are supplied with your individual quotation.

Container body excludes attachments. Dimensions are planning dimensions of the illustrated layout; additional installation and service space is required.
